Research Experience

Star-gas misalignment in “Horizon-AGN”, a cosmological large-volume simulation

2018–present

- Supervised by Prof. Sukyoung K. Yi
- Analyzed physical properties and environment of the star-gas misaligned galaxies in the Horizon-AGN simulation and compared the result with those of the Sydney-AAO Multi-object Integral field spectrograph (SAMI) Galaxy Survey.
- Investigated the origin of star-gas misalignment in the simulation.

Analyzing the properties of the simulated galaxies in “Horizon-AGN” and “New Horizon”

2019–present
